### THE JOURNEY

**H. KAYAD**  
Politics Writer

We are all travelers in time. Time is always pushing us forward (time is life, time is money and the life is too short). We will never have the choice to stop the tickling of the clock. But what that JOURNEY makes of us is a matter of choice.

Our success as voyagers on whether or not the choices we are making are based upon sound belief, those that are truly rooted in reality and it is important to remember always that our choices affect not only ourselves, but also every one around.

We cannot change yesterday's choice, and it is impossible to predict exactly what tomorrow's choices will be. We have only the present-the choices in front of us right now, demanding our attention.

Today is the only time we really control, the only time when decision can be made. Today is where we interpret our past and make our future endeavor, which is a different story. Furthermore, we adopt certain beliefs in our lives-perceptions in which we believe to be true that will help satisfy our needs and wants. Finally, your policy of the life could be the beginning and/or the end of your destiny.
